

PREGNANCY OUTCOME HIGHLIGHTS

- During 1996, 36,524 live births occurred to Kansas residents representing a birth rate of 14.2 per 1,000 population. There was a 2.1 percent decrease in the 1996 birth rate from the 1995 rate of 14.5. (Table 5)
- In 1996, Finney, Seward and Geary counties had the highest county birth rates of 25.2, 24.0 and 22.2 births per 1,000 population respectively. Garden City, Junction City and Liberal had the highest 1996 city birth rates of 27.0, 26.5 and 25.0 births per 1,000 population respectively. (Tables 5 and 6, Figure 11)
- Geary, Finney and Seward counties had the highest five-year county birth rates of 30.8, 23.7 and 22.3 births per 1,000 population respectively. (Table 5)
- Since 1956, birth rates for Kansas followed national trends and have steadily declined. Kansas birth rates have decreased 44.3 percent during the last 40 years from a rate of 25.5 births per 1,000 population in 1956 to a rate of 14.2 in 1996. After being above the U.S. birth rate since 1975, the Kansas rate dropped below the national rate in 1987. (Table 7, Figure 10)
- Kansas fertility rates have followed national trends and indicate a steady decline from 131.5 to 64.8 births per 1,000 female population aged 15-44 in 1956 and 1996 respectively. The increase in the fertility rate from 68.0 in 1989 to 70.1 in 1990 can be explained, in part, by the use of actual census counts for the 1990 female population. The Kansas fertility rate in 1996 (64.8) was 0.9 percent lower than the national rate of 65.4. (Table 7, Figure 12)
- Age-specific fertility rates for Kansas during the years 1986-1996 decreased 12.7 percent for the 15-24 age-group. Subsequently, age-specific fertility rates increased 9.8 percent for the 25-34 age-group and 45.4 percent for the 35-44 age-group. These shifts in fertility rates by age-group reflect the continuing trend in Kansas for women delaying childbirth until later years. (Table 8, Figure 13)
- In 1996, 38.8 percent of all Kansas live births occurred to women in the 15-24 age-group, 50.2 percent of live births occurred to women in the 25-34 age-group and 10.7 percent occurred to women in the 35-44 age-group. For comparison, in 1996, 23.8 percent of all Kansas live births had fathers in the 15-24 age-group, 55.1 percent were in the 25-34 age-group and 19.4 percent had fathers in the 35-44 age group. (Tables 9 and 10)
- Of the births to mothers 10-19 years of age, where the age of the father is known, just over one-third (36.9 percent) had fathers who were 10-19 while nearly two-thirds (63.1 percent) had fathers who were 20 and over. (Table 9)
- Eight percent (8.1) of live births in 1996 were preterm (less than 37 completed weeks of gestation) while 92 percent (91.9) occurred during 37 or more weeks of gestation. (Table 11)

PREGNANCY OUTCOME HIGHLIGHTS (Cont.)

- A total of 85.4 percent of all Kansas resident births in 1996 received prenatal care that began in the 1st trimester (first 3 months) of pregnancy, 11.9 percent began in the 2nd trimester and 2.0 percent began in the 3rd trimester. Nearly 1 percent (0.7) received no prenatal care. (Table 12)
- In 1996, 81.5 percent of Kansas live births both occurred to women 15-34 years of age and weighed between 2,500-4,499 grams. (Table 14)
- Birth weights for Kansas live births in 1996 were distributed as follows: 6.9 percent of live births weighed under 2,500 grams (low birth weight), 91.4 percent weighed 2,500-4,499 grams (normal birth weight) and 1.7 percent weighed over 4,499 grams (heavy birth weight). (Tables 13 and 14)
- In 1996, 39.3 percent of Kansas live births were first births. Of the 14,348 first births, 56.3 percent occurred to women in the 15-24 age-group. (Table 15, Figure 14)
- In 1996, 89.4 percent of Kansas live births were to white mothers, 7.6 percent were to black mothers and 3.0 percent were to mothers of other races. Furthermore, 51.2 percent of Kansas live births were male and 48.8 percent were female. (Table 16)
- In 1996, there were 9,798 out-of-wedlock births to Kansas residents. Of those births, 72.3 percent occurred to women in the 15-24 age-group. For comparison, in 1986, 73.8 percent occurred to women in this age group. (Table 17)
- The out-of-wedlock birth ratio has continued an upward trend over the years in both Kansas and the U.S. Out-of-wedlock births comprised 26.8 percent of all live births that occurred to Kansas residents in 1996, a 60.4 percent increase from 16.7 percent of live births in 1986. The out-of-wedlock birth ratio in 1996, was 17.3 percent lower than the U.S. proportion (32.4 percent) of births to unmarried women. (Figure 15)
- The pregnancy rate for females ages 10-19 increased 3.4 percent from 32.8 pregnancies per 1,000 in 1986 to 33.9 in 1996. Teen pregnancy rates for females ages 10-17 decreased 3.1 percent during this same time frame. (Table 18, Figure 16)
- In 1996, 87.2 percent of non-teen mothers of live births received prenatal care in the first trimester of pregnancy while only 71.5 percent of teen mothers received prenatal care in the first trimester. The percent of teens who received no prenatal care (1.3) was more than double that for non-teens (0.6). (Figure 17)
- Of the births to teenage women in 1996, 82.5 percent were to whites and 15.1 percent were to blacks. For comparison, in 1986, 81.4 percent of births to teenage women were to whites and 15.8 percent were to blacks. (Figure 18)

PREGNANCY OUTCOME HIGHLIGHTS (Cont.)

- In 1996, the abortion ratio for Kansas residents was 186.3 abortions per 1,000 live births, an increase of 71.9 percent from the 108.4 ratio in 1986. The large increase between the 1990 and 1991 abortion ratios (50.2 percent) does not reflect an increase in the number of abortions being performed but rather an increase in the number of providers reporting data. (Figure 19, Table 21)
- In 1996, 6,806 abortions that were reported were performed for Kansas residents and 4,367 were performed for non-Kansans. Of the 6,806 resident abortions, 496 occurred out of state. Residency was unknown for 8 abortions. Of those Kansas residents having abortions, 57.6 percent were in the 15-24 age-group, 79.4 percent were unmarried and 80.1 percent were white. (Figure 20, Tables 21 and 22)

*Ratio per 1,000 live births

** The increase in the 1989-1992 figures may not reflect an increase in the number of abortions being performed but rather an increase in the number of providers voluntarily reporting data.

*** As of July 1, 1995, reporting became mandatory for every medical care facility and every person licensed to practice medicine and surgery.

**** Residency data was not available for all abortions in 1989-1990 but due to improved reporting, was obtained for most of the abortions reported in subsequent years. This improved reporting is also responsible for the increase in the resident abortion ratio between 1990 and 1991.
